POLITÉCNICA

June 24, 2019, Madrid.

To whom it may concern,

I am writing this letter to recommend Daniel Camba Lamas. I've had the pleasure of having him under my employment for the past year. He is very polite, kind, a good communicator and works great under stressful situations.

At first he was hired together with another partner for the development in Unity of a simulation and editing environment for minimally invasive surgery tasks. But due to his versatility, he has also created the backend server for this environment, managing the databases and exposing the necessary data through a RESTful API, which will be accessed from the environment and other external tools. All this using a modern and robust programming language such as GoLang. He has also been responsible of the project landing page and a visualisation tool for the metrics generated by the simulation environment, using the vanilla version of JavaScript, CSS and HTML, for greater performance of the tool, a key factor when developing tools for surgeons.

Beyond his programming and data management skills. His knowledge in Photoshop and design has been a relief, being responsible for the image of the brand, logo and colors related to our main project and other secondary projects of the department carry his seal of originality.

Unfortunately, for reasons unrelated to his performance, he was forced to leave our department.

I am at your disposal to expand the information you need.  
Receive a warm greeting.

A handwritten signature in blue ink, which appears to read 'Patricia Sánchez', is written over a horizontal line.

Patricia Sánchez González  
PhD Assistant Professor at UPM
